

A high-speed train, blurred by motion, is passing through a modern subway station. The platform features a metal safety fence with a grid of raised circular bumps and a bright orange safety line. The station has a curved, ribbed ceiling and overhead power lines. Several people are standing on the platform in the distance.

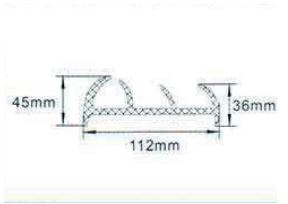

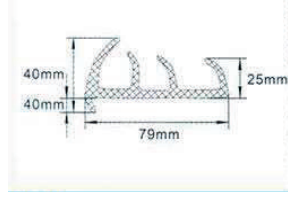

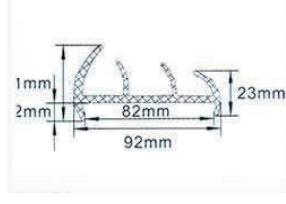

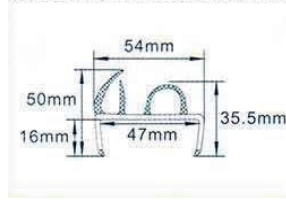

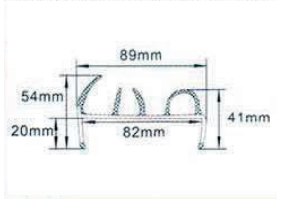

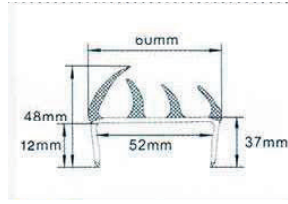

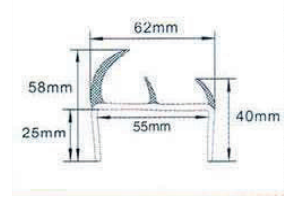

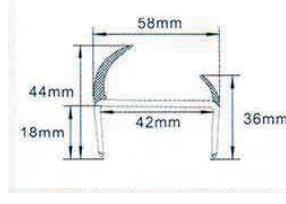

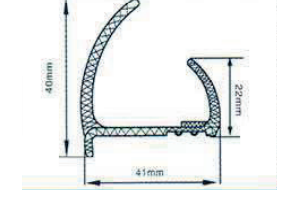

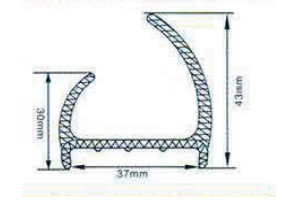

**EPDM cellular rubber profiles
with steel and one-sided self-adhesive**

Univergom started to operate in the field of rubber articles production in 1978, collaborating mostly with a company in the automotive sector. Shortly after its foundation, thanks to the strong spirit of collaboration among the business partners and to the knowledge acquired in the metal-rubber sector, the company started considering product diversification in order to reach new and important objectives and markets. Today, thanks to experience honed over 40 years of activity as well as to our first class technical performance, competitiveness and capacity for innovation, we are able to provide customers all over the world with quick and reliable solutions.

Certifications:

- UNI EN 45545-2:2015
- ISO 9001:2015
